

oeneye OS – End User License Agreement (EULA)

Version 1.0 – Finalized

Licensor: Kai Olaf Ketelhut, Curatorium / OENEYE OS Project

1. Acceptance

By downloading, installing, copying, or using oeneye OS ("the Software"), you agree to the terms of this Agreement. If you do not agree, do not install or use the Software.

2. License Grant

Subject to the terms of this Agreement, the Licensor grants you a non-exclusive, worldwide, royalty-free license to install, run, copy, and modify the Software, and to redistribute it or your modifications, **provided that:**

- this Agreement (and the MIT License terms governing the original codebase under Section 3)

is included with any redistribution, and

- you do not represent modified versions as being the official oeneye OS release without clearly marking them as modified.

3. Open-Source Components & Core License

oeneye OS incorporates third-party open-source components (including but not limited to WireGuard, and any Linux kernel or distro base used in the build scripts). Each such component remains governed by its own license (GPL, MIT, Apache 2.0, etc.).

The original oeneye-specific source code (including the DOS kernel, build scripts, branding tools, and font modules) is licensed under the **MIT License**:

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files, to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, subject to standard MIT conditions.

4. No Warranty

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NONINFRINGEMENT. THE LICENSOR DOES NOT WARRANT THAT THE SOFTWARE WILL BE ERROR-FREE OR UNINTERRUPTED, OR THAT DEFECTS WILL BE CORRECTED.

Note: oeneye OS includes boot-level and disk-image tooling (FAT12 parsing, image writing). A defect in disk-writing code can genuinely damage data; users are strongly advised to back up critical data prior to running disk-image utilities.

5. Limitation of Liability

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL THE LICENSOR BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, OR ANY LOSS OF DATA, PROFITS, OR USE, ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT OR THE USE OF THE SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

6. Accurate Description of Capabilities

The Licensor represents that documentation accompanying the Software describes its actual, verifiable functionality. Components described as experimental, in-development, or unverified are labeled as such in their accompanying documentation.

7. No Certification Claim

The Software has not been evaluated or certified under Common Criteria (ISO/IEC 15408) or any other formal security assurance scheme unless a specific component's documentation states an EAL rating explicitly and names the accredited evaluation lab and certificate number.

8. Termination

This license terminates automatically if you fail to comply with its terms. Sections 4–7 survive termination.

9. Governing Law

This Agreement shall be governed by and construed in accordance with the laws of **Berlin, Germany**, without regard to its conflict of law principles.
